Professional Summary

Final-year BSc Information Technology student graduating June 2026 with strong foundations in software development, data engineering, and machine learning. Experienced in building data-driven systems, developing REST APIs, and transforming raw data into actionable insights. Demonstrated ability to lead technical projects using Agile methodologies and deliver scalable solutions to real-world business problems. Passionate about financial technology and leveraging engineering and analytics to develop innovative customer-focused solutions within the banking sector.

Education

Bachelor of Science in Information Technology (BSc IT)

Richfield Graduate Institute of Technology

Graduating: July 2026

Technical Skills

Programming Languages

- Python (FastAPI, Pandas, NumPy, Scikit-learn)
- SQL
- R
- Java
- C# ASP.NET MVC CORE

Software Development

- REST API Development
- Backend Development
- Object-Oriented Programming
- System Integration
- System Design
- Application Development

Data Engineering & Analytics

- Data Cleaning & Transformation
- Data Modelling
- ETL Concepts

- Data Analysis & Reporting
- Power BI
- Statistical Analysis
- Machine Learning

Forecasting & Trend Analysis Tools & Technologies

- Git / GitHub
- Jira
- Power BI
- Excel
- Agile & Scrum
- N8n Workflow Automation
- Cloud Deployment Platforms

Project Experience

AutoInsight – Vehicle Market Intelligence & Price Prediction System Team Lead | Python, FastAPI, Machine Learning

- Led development of a **data-driven vehicle pricing intelligence platform** analysing online vehicle listings.
- Built **web scraping pipelines** to collect structured data from Cars.co.za.
- Performed **data cleaning, feature engineering, and statistical analysis** on large datasets.
- Co-developed a **machine learning regression model** to predict fair vehicle market prices.
- Implemented **REST API endpoints using FastAPI** to expose model predictions.
- Identified **overpriced vehicles through predictive comparisons** and pricing anomaly detection.
- Managed the project using **Agile Scrum methodology and Jira sprint planning**.
- Used **Git version control** to manage collaborative development.

School Placement Data Allocation System Data Analysis & Forecasting Project

- Designed a **data-driven allocation system** to optimise Grade 1 school placements.
- Built **Excel-based allocation models** to reduce overcrowding and improve placement planning.
- Developed **Power BI dashboards** to visualise registration trends and projected capacity issues.
- Applied **data analysis techniques** to support evidence-based education planning decisions.

Professional Experience

Freelance Software Engineer | Intellisekt Development | February 2026 – Present

Designed and developed full-stack web applications for clients, translating business requirements into scalable digital solutions.

- Built and deployed production-ready applications using modern development practices, including Git-based version control and cloud hosting platforms.
- Integrated secure online payment systems and third-party APIs to support business operations and customer transactions.
- Designed workflow automation solutions using n8n, automating email communications, booking processes, customer notifications, and WhatsApp integrations.
- Participated in system design, testing, deployment, and maintenance activities throughout the software development lifecycle.
- Applied Agile methodologies to manage project delivery, track progress, and continuously improve solutions based on client feedback.
- Collaborated directly with stakeholders to identify business challenges and implement technology-driven process improvements.

Quality Assessor

Clientele Life | Jan 2025 – Jan 2026

- Analysed **large volumes of call and compliance data** to ensure adherence to regulatory standards.
- Identified performance trends and delivered **actionable insights to improve service quality**.
- Worked within **enterprise financial systems and structured compliance frameworks**.

IT Support (Job Shadowing)

Clientele Life | Sept 2025 – Dec 2025

- Assisted with **system troubleshooting and infrastructure diagnostics**.
- Observed enterprise **IT operations and support workflows**.
- Participated in **Windows 10 to Windows 11 system upgrade deployment**.

Additional Strengths

- Analytical Problem Solving
- Data-Driven Decision Making
- Agile Team Collaboration
- Technical Documentation
- Customer-Focused Innovation

GitHub Portfolio

GitHub: <https://github.com/JudeRadebe10>

Featured Projects:

- AutoInsight Vehicle Pricing Intelligence System
- Data Scraping and Forecasting Tools
- Machine Learning Pricing Models
